PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience designing and developing scalable web applications using Node.js, Express.js, React.js, and MongoDB. Experienced in building microservices-based SaaS applications, dynamic form systems, and secure authentication mechanisms. Passionate about solving complex problems and building maintainable, high-performance software.

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript (Intermediate), C (Basic)
- Frontend: React.js , React Native (Basics) , React Hooks , HTML5 , CSS3 , Tailwind CSS , Redux , Redux Toolkit , Bootstrap
- Backend: Node.js, Express.js, Microservices, gRPC, Clean Architecture
- Database: MongoDB
- Authentication & Security: JWT Authentication
- Testing: Jest, Unit Testing
- Tools and Technologies: Git, GitHub, Webpack, Parcel, Postman
- Architecture: RESTful APIs, Multi-Tenant Architecture, SaaS Applications
- Payment Integration: Stripe

EXPERIENCE

- **FIELDIVA** March 2025 - Present
Full Stack Developer
 - Developed and maintained 30+ backend APIs using Node.js, Express.js, and TypeScript.
 - Implemented gRPC-based communication between microservices, improving internal service interactions.
 - Designed and developed a dynamic backend-driven Custom Form Builder supporting 15+ field types and conditional logic.
 - Built features for map-based task visualization and real-time field user tracking.
 - Implemented secure service-to-service authentication using JWT.
 - Developed Redux-based admin portal features and integrated CSV export and file upload functionalities.
 - Contributed to a multi-tenant SaaS platform serving Superadmin, Organization, Admin, and Field User applications.
 - Followed Clean Architecture principles to ensure modular, maintainable, and testable code.
- **STARSHOT DEVELOPMENT PRIVATE LIMITED** April 2023 - August 2024
Software Engineer
Key Responsibilities:
 - Developed RESTful APIs using Node.js and Express.js.
 - Optimized MongoDB queries and aggregation pipelines to improve performance.
 - Implemented JWT-based authentication and authorization.
 - Introduced unit testing using Jest and improved code quality.
 - Collaborated with cross-functional teams following Agile methodologies.
Key Project: Reliance Jio Project
 - Developed and optimized MongoDB queries, reducing API response times.
 - Designed and implemented backend APIs for service integration.
 - Wrote and maintained unit tests using Jest to ensure reliability and maintainability.
- **INTERN – FULL STACK DEVELOPER (MERN)** Nov 2022 - April 2023
 - Designed and implemented full stack solutions with a focus on scalability and usability.
 - Gained experience in Agile methodologies by actively participating in sprint planning, stand-ups, and

reviews.

- Worked on both frontend and backend components, ensuring smooth integration and delivery.

PROJECTS

- **SOURCER APP**

- Built a dynamic job portal using React.js for the frontend and Express.js for backend logic.
- Developed an admin management system using AdminJS to manage job listings and users effectively.
- Technologies Used: React.js, Express.js, MongoDB, AdminJS, REST APIs

- **WOOSLA APP**

- Created collaborative features that facilitated communication among users and organizations.
- Ensured secure data handling and enhanced platform usability through API integration.
- Technologies Used: React.js, Express.js, MongoDB, REST APIs

- **CONTACT MANAGEMENT APP**

- Developed a CRUD application with Angular and Express.js to manage and store contacts efficiently.
- Technologies Used: Angular, Express.js, MongoDB, REST APIs
